PROFILE

CHILLCHILL / Chengchao Tan is a China-born, Berlin-based artist working across moving image, 3D, game engines and real-time audiovisual systems. Works begin with concrete frictions, jokes or small triggers in everyday life and develop through making. From the present viewpoint, earlier ways of mixing filmed and synthetic images are converging with sound, bodies, software and narrative. *Polyphonic Audiovisual System* is a newly named working hypothesis—not an origin story imposed on the earlier works.
